DETAILED ACTION

Specification

The abstract does not include that which is new in the art to which the invention pertains. Since Applicants' invention is an improvement to old processes and products, the abstract should include the technical disclosure of the improvement. Correction is required. See MPEP § 608.01(b).

Drawings

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to because the gels lack resolution.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 and 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 5 appear incomplete for omitting essential steps, such omission amounting to a gap between the steps. Specifically, the sequential steps of "modifying" immediately followed by "cleaving" is indefinite because the purpose of "modifying" is not clear. One or more steps pertaining to doing something with the modified protein after performing the step of "modifying" appear omitted from the claim. See MPEP § 2172.01.

In claims 9, 14, 16 and 17, the phrase "house dust" is indefinite because the composition of "house dust" is not clear.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 10-13, 15 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Wiktorowicz & Raysberg (US 6,214,191).

Wiktorowicz & Raysberg describe a detection method comprising:

(1)(2) modifying/cleaving cysteinyl protein (see col. 12, line 37, "cysteine-selective reagents");

(3) detecting modified-cleaved cysteinyl protein (see Title, "Electrophoresis").

With respect to claim 5, Wiktorowicz & Raysberg describe detecting proteins from viruses, bacteria, fungi, and microbes, along with "toxicity testing" (see col. 17, lines 13-34).

Claims 1, 2, 4-6, 8-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Buchanan *et al.* (US 5,952,034).

Buchanan *et al.* describe a detection method comprising:

(1)(2) modifying/cleaving cysteinyl protein (see col. 14, line 10, "mBBr Fluorescent Labeling");

Art Unit: 1641

- (3) detecting modified-cleaved cysteinyl protein (see col. 14, lines 10, "SDS-polyacrylamide Gel Electrophoresis Analysis").

Conclusion
